Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1 and 9 are rejected under 35 U.S.C. 102(a) as being anticipated by McNew (6,487,990). McNew shows a litter box 54 comprising a tray having a bottom 16, a pair of end walls 18, 48 and a pair of side walls 44; and an enclosure comprising a pair of side panel 24, 50 extending above the tray end walls 18, 48 and a top panel 14 extending between the enclosure side walls 24, 50. The tray side walls comprising an inner side wall 44, 20 and an outer side wall (unnumbered) with wall flaps 40, 41 extending along tray end walls 18, 48 and interlocking with each other, see fig. 4.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over McNew in view of McGivern (5,865,140). McNew does not teach the use of closure flaps. McGivern shows a litter box comprising a pair of side panels 23, a top panel 27 and a pair of closure flaps 35, 65 foldably connected to the side panels 23, see

Art Unit: 3644

figs. 3 and 4, and further comprising side flaps 49 attached to the sides of the closure flaps 35, 65 and top flaps 71 attached to the top edges of the closure flaps 35, 65.

Closure panel 35 having a removable panel 41, see fig. 4. With respect to claim 2, to use the closure flaps of McGivern with the litter box of McNew would have been obvious to one skilled in the art in order to provide a more enclosed area either for increased comfort of the animal using the device or to cut down on the amount of litter tracked or kicked from the box. With respect to claim 3, to use the side and top flaps of McGivern with the litter box of McNew would have been obvious to one skilled in the art as a replacement of functional equivalents.

Allowable Subject Matter

Claims 4, 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference on foldable litter boxes are: Riccio (3,581,975), Hines et al (5,249,550), Franczak et al (5,832,869), Robinson (5,845,601) and Crosse (6,065,429).
